Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 20-35 and 37 are rejected under 35 U.S.C. § 102(b) as being anticipated by WO 93/18786. (AL on the IDS).

The '786 patent teaches treating a human with Diabetes that requires insulin, GLP-1(7-36) amide or GLP-1(7-37), intranasally or orally at a selected time prior to ingestion of a meal. The tem comprising in the claims opens the claimed invention to additional compounds, i.e. the oral hypoglycaemic agent.

The prior art teachings (clearly) anticipate the claimed invention.

5. Claims 15-19 are allowable in their current state and claims 36, 38-39 are objected as being dependent upon rejected claims.
